

Recommendations for cleaning Point Mobile devices

November 2020

What you need

- Disinfectant:
 - Isopropyl alcohol or ethanol (70% solution at a minimum) OR
 - Household bleach (5-6% sodium hypochlorite) approx. ½ cup bleach diluted in ½ liter of water
- Soft paper tissue or microfiber towel

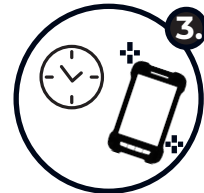

Follow these steps

Spray the solution onto a soft paper tissue or microfiber towel

Wipe the device to clean it thoroughly, including screen and buttons

Let the residue dry for a minute or two and your device is clean and good to go

Caution!

DO NOT spray the cleaning solution directly onto your device. Always use a fresh soft tissue or microfiber towel. **DO NOT** use aggressive cleaning agents or abrasive pads to clean your device as it may cause damage. If eye or skin contact occurs thoroughly wash out with water and seek medical advice immediately.

Further information

For further information about COVID-19 and correct disinfection, please refer to the CDC:
