

## Scanning SDK Development Document Description

| version | date       | Revision | description |
|---------|------------|----------|-------------|
| V1.0    | 2018-05-15 | Tu       |             |
|         |            |          |             |

### Table of Contents

|  |   |
|--|---|
| Scanner Introduction and Overview..... | 1 |
| 1 Import JAR package.....              | 2 |
| 2 function description.....            | 2 |
| 2.1 Obtain ScanDevice Instance.....    | 2 |
| 2.2 Power on.....                      | 3 |
| 2.3 Power off.....                     | 3 |
| 2.4 Start Scan.....                    | 3 |
| 2.5 Stop Scan.....                     | 4 |
| 2.6 Start Continous Scan.....          | 4 |
| 2.7 Stop Continous Scan.....           | 4 |
| 2.8 Set Continous Time.....            | 5 |

## 1. Import JAR package

## 2 .function description

### 2.1 Obtain ScanDeVice Instance

|               |                                     |
|---------------|-------------------------------------|
| Function name | public ScanDevice (Context contetx) |
| Effect        | Obtain ScanDeVice Instance          |
| Parameter     | Context                             |
| Back          | No                                  |

## 2.2 Power on

|               |                         |
|---------------|-------------------------|
| Function name | public void openScan () |
| Effect        | Open Scan Power         |
| Parameter     | no                      |
| Back          | void                    |

## 2.3 Power off

|               |                          |
|---------------|--------------------------|
| Function name | public void closeScan () |
| Effect        | Close Scan Power         |
| Parameter     | no                       |
| Back          | void                     |

## 2.4 Start Scan

|               |                          |
|---------------|--------------------------|
| Function name | public void startScan () |
| Effect        | Start Scan               |
| Parameter     | no                       |
| Back          | void                     |

## 2.5 Stop Scan

|               |                         |
|---------------|-------------------------|
| Function name | public void stopScan () |
| Effect        | Stop Scan               |
| Parameter     | no                      |
| Back          | void                    |

## 2.6 Start Continous Scan

|               |                              |
|---------------|------------------------------|
| Function name | public void ContinousStart() |
| Effect        | Enable continuous scanning   |
| Parameter     | no                           |
| Back          | void                         |

## 2.7 Stop Continous Scan

|               |                             |
|---------------|-----------------------------|
| Function name | public void ContinousStop() |
| Effect        | continuous scanning         |
| Parameter     | no                          |
| Back          | void                        |

## 2.8 Set Continous Time

|               |                                |
|---------------|--------------------------------|
| Function name | public void TimeScan(int time) |
| Effect        | Continuous scan time           |
| Parameter     | int                            |
| Back          | void                           |
